

HangarSpec™ HB-3 High-Build Coating System

System Description:

A three coat high-build coating system utilizing a moisture-tolerant primer and build coat that is top coated with either a high-performance aliphatic polyester urethane or a polyaspartic. This system produces a high-gloss, chemical-resistant, light-reflective surface and is recommended for re-coat and standard performance requirements in hangars or general aircraft maintenance areas.

System Advantages:

- High-gloss for superior light-reflectance
- No solvent odor
- Topcoat available in array of textures
- Quick turnaround, minimal downtime
- Excellent resistance to aviation chemicals
- Aesthetically-pleasing for general use areas

System Installation Overview:

1. Apply Protect 1200 WR primer to properly prepared substrate and allow to cure
2. Apply Protect 1000 HB build coat and allow to cure
3. Apply desired topcoat with desired finish texture and allow to cure

All HangarSpec floor coating systems can be enhanced with PIP's proprietary Gloss-Grip Technology. This additive greatly enhances both the safety and wear characteristics of your floor coating system while retaining a slip-resistant, yet high-gloss, finish that is easy to clean and maintain. These systems not only exhibit longer service lives; they help you save money by reducing maintenance costs.
