

InhibiWear BC-CR Chemical-Resistant Broadcast System

System Description:

A broadcast floor system consisting of a chemical-resistant epoxy primer followed by an intermediate novalac epoxy broadcast with silica aggregate. The system is top coated with a highly chemical-resistant novalac epoxy. This broadcast floor system is suited for shop areas exposed to various chemicals including strong acids, caustics and solvents.

System Advantages:

- Available in a wide array of colors
- Fast-Cure
- Extremely hard, semi-gloss finish
- Excellent chemical resistance including acids, caustics and solvents

System Installation Overview:

1. Apply Protect 1000 CR primer to properly prepared substrate and allow to cure
2. Apply Protect 1750 Novalac body coat broadcast with silica aggregate and allow to cure
3. Apply Protect 1750 Novalac topcoat and allow to cure
