

InhibiWear MT-G General Use Mortar System

System Description:

A general use heavy-duty mortar system consisting of an epoxy primer followed by an application of a trowel-applied epoxy mortar. The system is then grout coated with an epoxy grout material and top coated with a high-performance urethane. This mortar system will resurface badly damaged concrete to a new, more durable surface. This system is ideal for industrial areas exposed to heavy use and forklift traffic.

System Advantages:

- Very durable
- Excellent chemical resistance
- Resurfaces damaged concrete substrates
- Very good impact and abrasion resistance
- Available in a wide array of colors

System Installation Overview:

1. Apply Protect 1000 HB primer to properly prepared substrate and allow to cure
2. Apply Protect 3600 EM epoxy mortar system and allow to cure
3. Apply Protect 1000 Grout and allow to cure
4. Apply Protect 2000 UR topcoat and allow to cure
