

## InhibiWear SL-G General Use Slurry System

### System Description:

A slurry/resurfacer system consisting of a moisture-tolerant primer followed by an epoxy slurry coating. The system is then top coated with a chemical-resistant urethane. This general use system can be pigmented in a variety of colors, and features good chemical and abrasion resistance. Suited for use in areas where the concrete slab is worn or slightly damaged.

### System Advantages:

- Extremely low odor
- Self levels to a smooth, glossy surface
- Good chemical and abrasion resistance
- Restores old or damaged concrete
- Resists staining from general cleaning chemicals
- Available in a wide array of UV-stable colors

### System Installation Overview:

1. Apply Protect 1200 WR primer to properly prepared substrate and allow to cure
2. Apply Protect 3610 ESR epoxy slurry resurfacer and allow to cure
3. Apply Protect 2000 UR topcoat and allow to cure
