

RescueSpec HB-4 Premium High-Build Coating System

System Description:

A four coat high-build coating system utilizing a moisture-tolerant primer and build coats with a topcoat(s) of either an aliphatic polyester urethane or a polyaspartic. This system features enhanced chemical-resistance, gloss and light-reflectance and is recommended for areas requiring reapplication after coating removal or engine bays with extended performance requirements.

System Advantages:

- High-gloss for superior light-reflectance
- No solvent odor
- Topcoat available in array of safety textures
- Quick turnaround, minimal downtime
- Enhanced chemical-resistance
- Ideal for high-traffic service bays

System Installation Overview:

1. Apply Protect 1200 WR primer to properly prepared substrate and allow to cure
2. Apply Protect 1000 HB build coat and allow to cure
3. Apply 2nd Protect 1000 HB build coat and allow to cure
4. Apply desired topcoat with desired finish texture and allow to cure
5. Apply Optional 2nd desired topcoat with desired finish texture and allow to cure

All RescueSpec floor coating systems can be enhanced with PIP's proprietary Gloss-Grip Technology. This additive greatly enhances both the safety and wear characteristics of your floor coating system while retaining a slip-resistant, yet high-gloss, finish that is easy to clean and maintain. These systems not only exhibit longer service lives; they help you save money by reducing maintenance costs.
