

BrewSpec™ TB Antimicrobial Thick-Build Coating System

System Description:

A high-performance flooring system consisting of an antimicrobial concrete pretreatment, an antimicrobial epoxy primer and build coat(s) that is top coated with an aliphatic high-performance antimicrobial polymer. This system is formulated for use in areas such as production and packing rooms, walkways and laboratories where overall chemical resistance and light-reflectance are a requirement.

System Advantages:

- Redundant system protects against microbe growth
- Antimicrobial protection penetrates up to 6" within concrete slab
- Easy to clean and sanitize
- USDA-compliant/CFIA-approved
- Quick turnaround minimizes downtime
- Antimicrobial properties effective for life of floor system

System Installation Overview:

1. Dampen concrete substrate prior to applying Protect AM-PT
2. Spray-apply Protect AM-PT in two passes and allow to fully purge concrete
3. Apply Protect 1000 AM primer and allow to cure
4. Apply Protect 1000 AM basecoat(s) and allow to cure
5. Apply Protect 2000 AM or Protect 4000 AM topcoat and allow to cure
