

## HangarSpec™ CM-P Cementitious Mortar With Polymer Topcoat(s)

### System Description:

A cement-based mortar/resurfacer system coated with a moisture-tolerant epoxy, then top coated with an aliphatic urethane. This system produces a durable, restored concrete substrate with a high-gloss, chemical-resistant, light-reflective surface profile that is ideal for hangars or reconditioned areas.

### System Advantages:

- Wide array of decorative quartz and flake color combinations
- High tolerance to moisture
- Very low-odor
- Excellent chemical-resistance
- Thermal shock resistant
- Ideal for showrooms, restrooms and waiting areas

### System Installation Overview:

1. Apply Protect Level-Cast and allow to cure
2. Apply Protect 1200 WR and allow to cure
3. Apply Protect 2000 UR and allow to cure

All HangarSpec floor coating systems can be enhanced with PIP's proprietary Gloss-Grip Technology. This additive greatly enhances both the safety and wear characteristics of your floor coating system while retaining a slip-resistant, yet high-gloss, finish that is easy to clean and maintain. These systems not only exhibit longer service lives; they help you save money by reducing maintenance costs.
